-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Information Disclosure Statement

1. The IDS filed 9/4/7 has been considered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1, 2, and 4-6 are rejected under 35 U.S.C. 102(e) as being anticipated by Barth et al. (US 6,580,090 B2).

Barth '090 discloses a device comprising a substrate 15 with a device region comprises cells; a cap 16 for encapsulating the device, the cap creating a cavity over

FIG. 5

the device region; and spacer particles 14c on the substrate supporting the cap, the spacer particles comprising a base and an upper portion, the base having a first surface adjacent to the substrate, the first surface having a first width, and the first width is wider than the upper portion (for claim 1), wherein the spacer particles having a non-spherical shape; and wherein the cells comprise OLED cells of an OLED device (for claim 2).

Concerning claims 4-6, wherein the spacer particles comprises a non-conductive material (see column 5, line 28), and wherein the spacer particles comprise an average height to maintain a height of the cavity and/or comprises a density to maintain separation between the cap and the device region, please see Fig. 5 above.

3. Claims 3, 7-21, and 43-45 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The applied reference fails to disclose and/or suggest wherein the spacer particles comprise a half-spherical.

Allowable Subject Matter

4. Claims 46-48 are allowed.

The following is an examiner's statement of reasons for allowance: the applied reference fails to disclose and/or suggest that the bottom surface of the spacer particle is flat and is the widest portion of the particle.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. The reference is cited and should be carefully considered: Ohoshi et al. (US 5,949,184) discloses a light emitting device (see Fig. 1).
